Sample XML configuration file	16

Introduction

The purpose of this guide is to help you understand the available configuration options that allow you to customize the look and feel of your slideshow using Slide.Show 2.

Configuring your slideshow

To give substance to your slideshow, you'll need to configure it. A configuration provider is specified via the `initParams` of your Slide.Show 2 object tag.

```
<param name="initParams"  
value="ConfigurationProvider=[configuration],DataProvider=..." />
```

Slide.Show 2 provides you with the following options for configuration:

- Option 1.** Specify a theme
- Option 2.** Specify an XML file

Option 1: Using a theme

A theme is a set of values for the available configuration options that provide a consistent look and feel for a slideshow. Using a theme is the easiest way to configure your slideshow. The available out-of-the-box themes are: `SimpleTheme`, `LightTheme`, and `DarkTheme`.

To specify a theme, modify the `initParams` of your Slide.Show 2 object tag by replacing `[configuration]` with the desired theme. In the following example, we are specifying the `LightTheme`:

```
<param name="initParams"  
value="ConfigurationProvider=LightTheme,DataProvider=..." />
```

***Tip:** In code, a theme is implemented as a class. To implement a custom theme, please refer to `LightTheme.cs` in the source code. Make a copy of the theme that most closely resembles your desired theme and make changes as appropriate in the desired regions. Then, open up `App.xaml.cs` and add your new theme to the case statement in `InstantiateConfigurationProvider`.*

Option 2: Using an XML file

This option is available to those who want full control over the look and feel of their slideshow. Here you are to create an XML file, specifying the value of each option as desired.

To use XML configuration, modify the `initParams` of the Slide.Show 2 object tag by replacing `[configuration]` with `XmlConfigurationProvider` and the path to your XML configuration file. In the

following example, we are using a file named Configuration.xml located in the same folder as the Slide.Show 2 XAP file:

```
<param name="initParams"
value="ConfigurationProvider=XmlConfigurationProvider;Path=Configuration.xml,
DataProvider=..." />
```

Next, create a file named **Configuration.xml** containing the following markup:

```
<configuration background="Silver">
  <module name="NavigationTray">
    <option name="Enabled" value="true" />
    <option name="BackgroundOpacity" value="1" />
    <option name="Background" value="White" />
    ...
  </module>
  ...
</configuration>
```

Modules represent a logical grouping of configuration options. Each module contains a set of options that specify the look and feel of their respective element/control. A full listing of modules is below.

Configuration details (XML)

Configuration modules

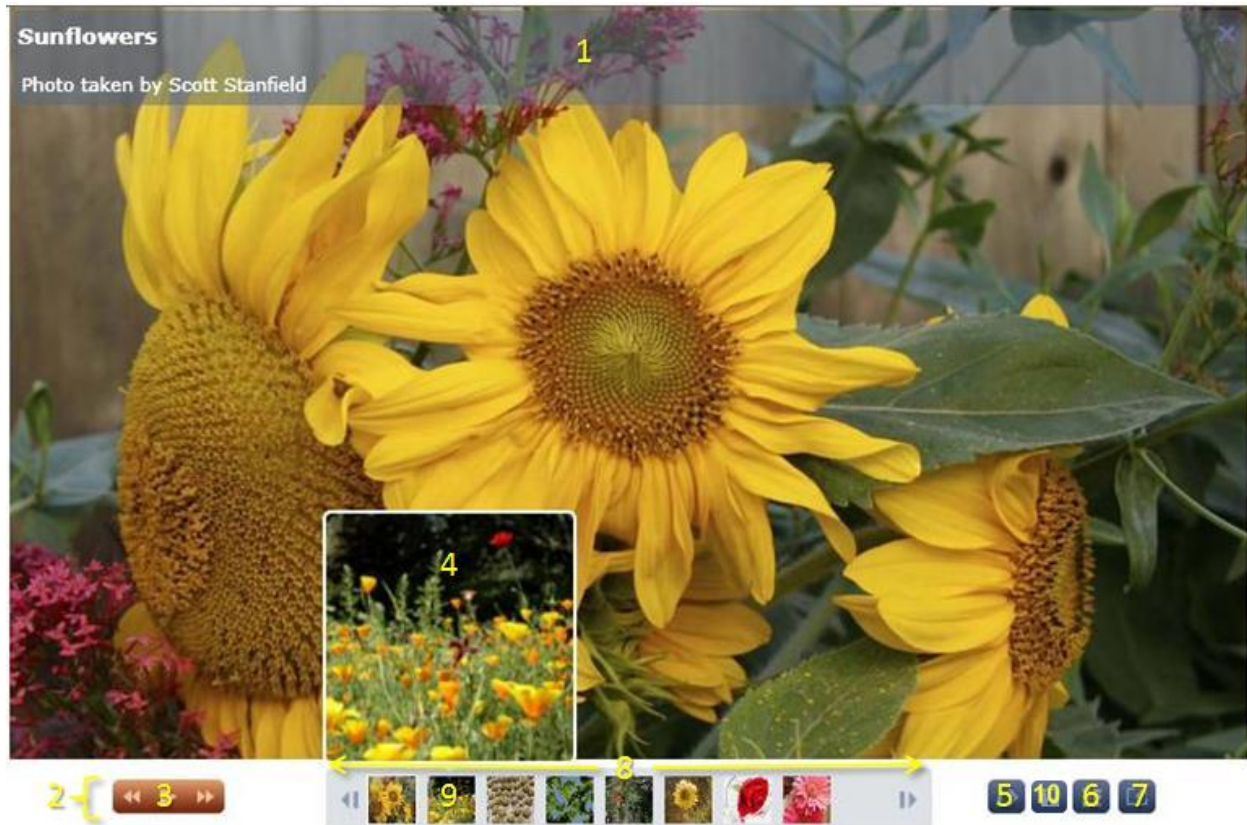

The following is a list of the available modules and a brief description of each one:

Module	Description
General	General options for the Slide Show
Transition	Transition timing related options
DataProvider	Controls the DataProvider type
Preloader	Controls the number of images to preload
LoadingProgressIndicator	Options for display of a "loading..." progress indicator
SlideNavigation	Displays UI to navigate between slides and to play/pause slides
EmbedViewer	Displays details for embedding the current slideshow
NavigationTray	Hosts the navigation elements for the slideshow
ToggleAlbumViewButton	The button used to show/hide the AlbumViewer
ToggleFullScreenButton	The button used to toggle full-screen mode
ToggleEmbedViewButton	The button used to show/hide the EmbedViewer
ToggleSaveButton	The button used to allow user to download the current image
SlideDescription	Displays basic information for the current slide
AlbumViewer	Displays the available albums
ThumbnailViewer	Displays a list of slide thumbnails
SlideThumbnail	Represents a thumbnail within the ThumbnailViewer
AlbumPage	Displays a page of albums
AlbumButton	Displays basic information for an album
SlidePreview	Displays the preview of a slide
SlideViewer	Includes option for how images should be stretched

VideoViewer	Includes option for automatically starting videos
VideoTray	Displays elements for interacting with a video

Module element reference

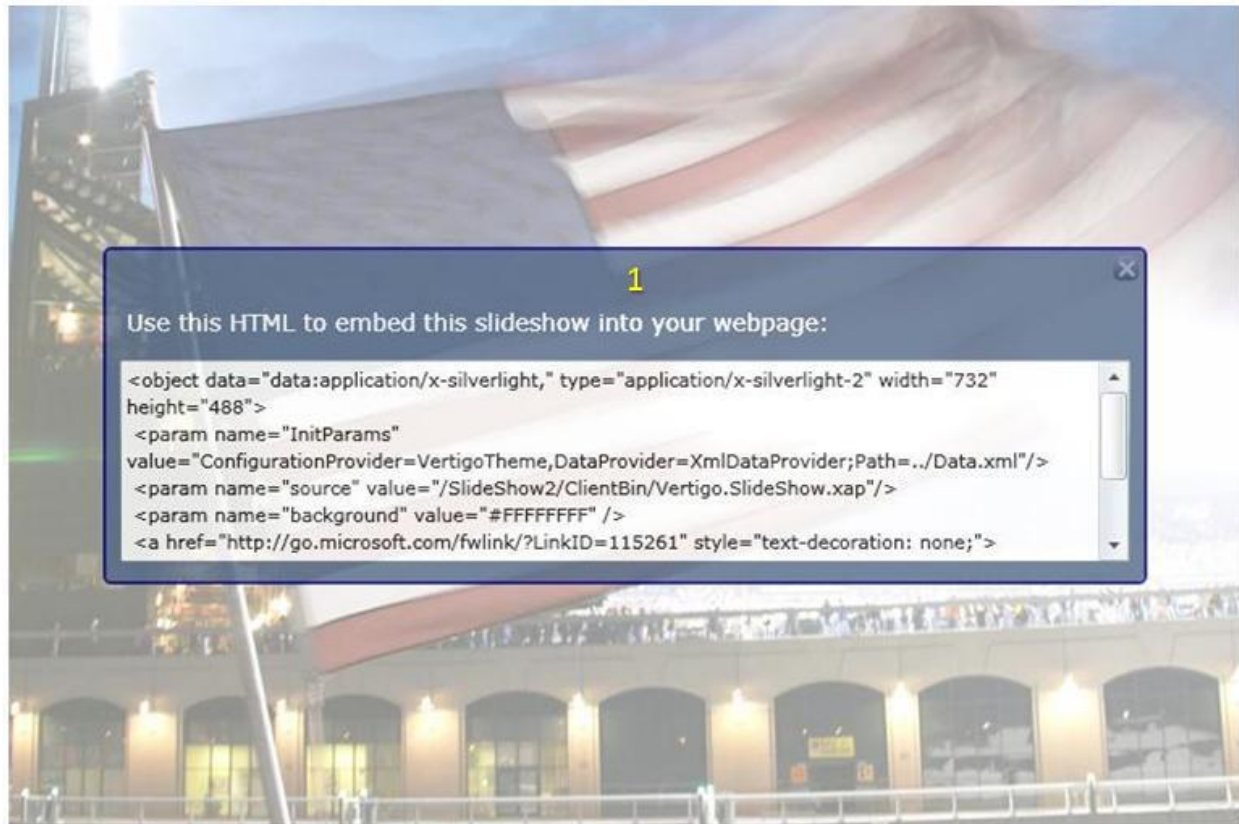

The following provides a visual reference to the available modules:

1. SlideDescription
2. NavigationTray
3. SlideNavigation
4. SlidePreview
5. ToggleEmbedViewButton
6. ToggleAlbumViewButton
7. ToggleFullScreenButton
8. ThumbnailViewer
9. SlideThumbnail
10. ToggleSaveButton

1. AlbumViewer
2. AlbumPage
3. AlbumButton

1. EmbedViewer

1. VideoTray

Module options

The following is a list of the available options for each module:

General

Option	Type	Description
Background	Color	Background color
AutoStart	Boolean	Indicates if slide shows should start playing automatically when opened
StartInAlbumView	Boolean	Indicates if the slide show should start in album view by default

Transition

Option	Type	Description
TransitionDuration	Integer	The duration of each transition
WaitTime	Integer	The amount of time spent on each slide between transitions

DataProvider

Option	Type	Description
Type	String	DataProvider type. Valid values include FlickrDataProvider and XmlDataProvider
UserName	String	The Flickr username. Not used for XmlDataProvider.
ApiKey	String	The Flickr ApiKey. Not used for XmlDataProvider.
Uri	String	The Flickr Uri. Not used for XmlDataProvider.

Preloader

Option	Type	Description
PreloadAhead	Integer	The number of images to load ahead

LoadingProgressIndicator

Option	Type	Description
Enabled	Boolean	Indicates whether or not to display the element
Type	String	Valid options include “bar” and “circle”
Height	Integer	Height of the bar. Effectively ignored for circle.
Width	Integer	Width of the bar or the diameter of the circle.
Foreground	Color	Foreground color
Background	Color	Background color

SlideNavigation

Option	Type	Description
Enabled	Boolean	Indicates whether or not to display the element
PlayPathData	String	Abbreviated path markup for the visual
PausePathData	String	Abbreviated path markup for the visual
PreviousPathData	String	Abbreviated path markup for the visual
NextPathData	String	Abbreviated path markup for the visual
Foreground	Color	Color of the foreground
ForegroundHover	Color	Color of the hover of the foreground
Background1Brush	Color	Color of the background gradient
Background2Brush	Color	Color of the background gradient
RadiusX	Double	X radius of the corner
RadiusY	Double	Y radius of the corner
Width	Double	Width of the element
Height	Double	Height of the element
PlayPauseButtonWidth	Double	Width of the play/pause button
PlayPauseButtonHeight	Double	Height of the play/pause button
NextButtonWidth	Double	Width of the next button
NextButtonHeight	Double	Height of the next button
PreviousButtonWidth	Double	Width of the previous button
PreviousButtonHeight	Double	Height of the previous button
PlayPauseButtonPathWidth	Double	Width of the path for the play/pause button

PlayPauseButtonPathHeight	Double	Height of the path for the play/pause button
NextButtonPathWidth	Double	Width of the path for the next button
NextButtonPathHeight	Double	Height of the path for the next button
PreviousButtonPathWidth	Double	Width of the path of the previous button
PreviousButtonPathHeight	Double	Height of the path of the previous button

EmbedViewer

Option	Type	Description
Enabled	Boolean	Indicates whether or not to display the element
Background	Color	Color of the background
BackgroundOpacity	Double	Opacity of the background (0-1)
CornerRadius	Double	Radius of the corner (CornerRadius or Double)
DialogBackground	Color	Color of the background of the dialog
DialogBackgroundOpacity	Double	Opacity of the background of the dialog (0-1)
DialogBorderBrush	Color	Color of the border of the dialog
DialogBorderThickness	Double	Thickness of the border of the dialog
DialogWidth	Double	Width of the dialog
DialogHeight	Double	Height of the dialog
CloseButtonBackground1Brush	Color	Color of the background gradient
CloseButtonBackground2Brush	Color	Color of the background gradient
CloseButtonForegroundBrush	Color	Color of the close button
CloseButtonForegroundHoverBrush	Color	Color of the hover for the close button
CloseButtonRadiusX	Double	X radius of the close button corner
CloseButtonRadiusY	Double	Y radius of the close button corner
CloseButtonMargin	Double	Margin of the close button (Margin or Double)
CloseButtonWidth	Double	Width of the close button
CloseButtonHeight	Double	Height of the close button
CloseButtonPathWidth	Double	Width of the path for the close button
CloseButtonPathHeight	Double	Height of the path for the close button
CloseButtonPathData	String	Abbreviated path markup for the visual
HyperlinkButtonText	String	Text for the copy to clipboard link
HyperlinkButtonMargin	Double	Margin of the clipboard link (Margin or Double)
HyperlinkButtonForeground	Color	Color of the link foreground
HyperlinkButtonBackground	Color	Color of the link background
HyperlinkButtonWidth	Double	Width of the link
HyperlinkButtonHeight	Double	Height of the link
HyperlinkButtonFontFamily	String	Font of the link
HyperlinkButtonFontSize	Double	Font size of the link
TextBlockFontFamily	String	Font of the title text block
TextBlockFontSize	Double	Font size of the title text block
TitleText	String	Text to display in the title
TextBlockMargin	Double	Margin of the title text block (Margin or Double)
TextBlockForeground	Color	Color of the title text block
TextBoxWidth	Double	Width of the output text box

TextBoxHeight	Double	Height of the output text box
TextBoxFontFamily	String	Font of the output text block
TextBoxFontSize	Double	Font size of the output text block
TextBoxBackground	Color	Color of the background for the output text box
TextBoxForeground	Color	Color of the foreground for the output text box

NavigationTray

Option	Type	Description
Enabled	Boolean	Indicates whether or not to display the element
BackgroundOpacity	Double	Opacity of the background (0-1)
Background	Color	Color of the background

ToggleAlbumViewButton

Option	Type	Description
Enabled	Boolean	Indicates whether or not to display the element
Width	Double	Width of the element
Height	Double	Height of the element
PathWidth	Double	Width of the path visual
PathHeight	Double	Height of the path visual
PathData	String	Abbreviated path markup for the visual
Background1Brush	Color	Color of the background gradient
Background2Brush	Color	Color of the background gradient
ForegroundBrush	Color	Color of the foreground
ForegroundHoverBrush	Color	Color of the hover of the foreground
RadiusX	Double	X radius of the corner
RadiusY	Double	Y radius of the corner
Margin	Double	Margin of the element (Margin or Double)
Tooltip	String	Tooltip for the button. Set to empty string for no tooltip

ToggleFullScreenButton

Option	Type	Description
Enabled	Boolean	Indicates whether or not to display the element
Width	Double	Width of the element
Height	Double	Height of the element
PathWidth	Double	Width of the path visual
PathHeight	Double	Height of the path visual
PathData	String	Abbreviated path markup for the visual
Background1Brush	Color	Color of the background gradient
Background2Brush	Color	Color of the background gradient
ForegroundBrush	Color	Color of the foreground
ForegroundHoverBrush	Color	Color of the hover of the foreground
RadiusX	Double	X radius of the corner

RadiusY	Double	Y radius of the corner
Margin	Double	Margin of the element (Margin or Double)
RadiusY	Double	Y radius of the corner
GoToFullTooltip	Double	Tooltip for the enter full screen mode button.
EscapeFullTooltip	String	Tooltip for the escape full screen button.

ToggleEmbedViewButton

Option	Type	Description
Enabled	Boolean	Indicates whether or not to display the element
Width	Double	Width of the element
Height	Double	Height of the element
PathWidth	Double	Width of the path visual
PathHeight	Double	Height of the path visual
PathData	String	Abbreviated path markup for the visual
Background1Brush	Color	Color of the background gradient
Background2Brush	Color	Color of the background gradient
ForegroundBrush	Color	Color of the foreground
ForegroundHoverBrush	Color	Color of the hover of the foreground
RadiusX	Double	X radius of the corner
RadiusY	Double	Y radius of the corner
Margin	Double	Margin of the element (Margin or Double)
Tooltip	String	Tooltip for the button. Set to empty string for no tooltip

ToggleSaveButton

Option	Type	Description
Enabled	Boolean	Indicates whether or not to display the element
Width	Double	Width of the element
Height	Double	Height of the element
PathWidth	Double	Width of the path visual
PathHeight	Double	Height of the path visual
PathData	String	Abbreviated path markup for the visual
Background1Brush	Color	Color of the background gradient
Background2Brush	Color	Color of the background gradient
ForegroundBrush	Color	Color of the foreground
ForegroundHoverBrush	Color	Color of the hover of the foreground
RadiusX	Double	X radius of the corner
RadiusY	Double	Y radius of the corner
Margin	Double	Margin of the element (Margin or Double)
DownloadImageHandler	Double	Absolute URI to image download handler
Tooltip	String	Tooltip for the button. Set to empty string for no tooltip

SlideDescription

Option	Type	Description
Enabled	Boolean	Indicates whether or not to display the element
TitleHeight	Integer	Height of the title section of the element
TitleForeground	Color	Foreground color of the title
TitleBackground	Color	Background color of the title
TitleBackgroundOpacity	Double	Opacity of the title background (0-1)
TitleFontSize	Double	Font size of the title
TitleFontFamily	String	Font of the title
TitleMargin	Double	Margin of the title (Margin or Double)
DescriptionHeight	Integer	Height of the description section of the element
DescriptionForeground	Color	Foreground color of the description
DescriptionBackground	Color	Background color of the description
DescriptionBackgroundOpacity	Double	Opacity of the description background (0-1)
DescriptionFontSize	Double	Font size of the description
DescriptionFontFamily	String	Font of the description
DescriptionMargin	Double	Margin of the description (Margin or Double)
Background	Color	Background color
BackgroundOpacity	Double	Opacity of the background (0-1)
BackgroundRadiusX	Double	X radius of the background corner
BackgroundRadiusY	Double	Y radius of the background corner
BackgroundMargin	Double	Margin of the background (Margin or Double)
CloseButtonBackground1Brush	Color	Color of the background gradient
CloseButtonBackground2Brush	Color	Color of the background gradient
CloseButtonForegroundBrush	Color	Color of the foreground of the close button
CloseButtonForegroundHoverBrush	Color	Color of the hover of the close button
CloseButtonRadiusX	Double	X radius of the background corner
CloseButtonRadiusY	Double	Y radius of the background corner
CloseButtonMargin	Double	Margin of the close button (Margin or Double)
CloseButtonWidth	Double	Width of the close button
CloseButtonHeight	Double	Height of the close button
CloseButtonPathWidth	Double	Width of the path in the close button
CloseButtonPathHeight	Double	Height of the path in the close button
CloseButtonPathData	String	Abbreviated path markup for the visual

AlbumViewer

Option	Type	Description
Enabled	Boolean	Indicates whether or not to display the element
ScrollButtonForeground	Color	Color of the scroll button
ScrollButtonForegroundHover	Color	Color of the hover of the scroll button
ScrollButtonWidth	Double	Width of the scroll button
ScrollButtonHeight	Double	Height of the scroll button
ScrollButtonMargin	Double	Margin of the scroll button (Margin or Double)
LeftScrollButtonData	String	Abbreviated path markup for the visual
RightScrollButtonData	String	Abbreviated path markup for the visual

PageNumberFontSize	Double	Font size of the page number
PageNumberFontFamily	String	Font of the page number
PageNumberForeground	Color	Color of the page number

ThumbnailViewer

Option	Type	Description
Enabled	Boolean	Indicates whether or not to display the element
Background	Color	Color of the background
BackgroundOpacity	Double	Opacity of the background (0-1)
BackgroundRadiusX	Double	X radius of the background corner
BackgroundRadiusY	Double	Y radius of the background corner
Width	Double	Width of the element
Height	Double	Height of the element
Margin	Double	Margin of the element (Margin or Double)
ThumbSpacing	Double	Spacing between the thumbnails
ScrollIncrement	Double	Indicates how much space each scroll covers
ScrollButtonBrush	Color	Color of the scroll button
ScrollButtonHoverBrush	Color	Color of the hover of the scroll button
ScrollButtonWidth	Double	Width of the scroll button
ScrollButtonHeight	Double	Height of the scroll button
ScrollButtonMargin	Double	Margin of the scroll button (Margin or Double)
ScrollRepeatButtonInterval	Double	Indicates how fast the elements scroll
LeftScrollButtonData	String	Abbreviated path markup for the visual
RightScrollButtonData	String	Abbreviated path markup for the visual

SlideThumbnail

Option	Type	Description
Height	Double	Height of the element
BorderBrush	Color	Color of the border
BorderHighlightBrush	Color	Color of the highlight for the border
BorderThickness	Double	Thickness of the border (Thickness or Double)

AlbumPage

Option	Type	Description
Background	Color	Color of the background

AlbumButton

Option	Type	Description
Background	Color	Color of the background
BackgroundHover	Color	Color of the hover for the background

TitleFontSize	Double	Font size of the title
TitleFontFamily	String	Font of the title
TitleForeground	Color	Color of the title
TitleMargin	Double	Margin of the title (Margin or Double)
DescriptionFontSize	Double	Font size of the description
DescriptionFontFamily	String	Font of the description
DescriptionForeground	Color	Color of the description
DescriptionMargin	Double	Margin of the description (Margin or Double)
Width	Double	Width of the element
Height	Double	Height of the element
Padding	Double	Padding of the element
BackgroundRadiusX	Double	X radius of the background corner
BackgroundRadiusY	Double	Y radius of the background corner
ThumbnailWidth	Double	Width of the thumbnail
ThumbnailHeight	Double	Height of the thumbnail
ThumbnailRadiusX	Double	X radius of the thumbnail corner
ThumbnailRadiusY	Double	Y radius of the thumbnail corner
ThumbnailMargin	Double	Margin of the thumbnail (Margin or Double)
ThumbnailBorderStroke	Color	Color of the border for the thumbnail
ThumbnailBorderThickness	Double	Thickness of the border for the thumbnail

SlidePreview

Option	Type	Description
Enabled	Boolean	Indicates whether or not to display the element
Height	Double	Height of the element
BorderBrush	Color	Color of the border of the element
BorderWidth	Double	Width of the border of the element
RadiusX	Double	X radius of the corner of the element
RadiusY	Double	Y radius of the corner of the element

SlideViewer

Option	Type	Description
Stretch	Stretch	Type of Stretch that should be used when displaying images

VideoViewer

Option	Type	Description
AutoPlay	Boolean	Indicates if a video slide will play automatically

VideoTray

Option	Type	Description
--------	------	-------------

Enabled	Boolean	Indicates whether or not to display the element
Width	Double	Width of the element
Height	Double	Height of the element
PlayPauseButtonWidth	Double	Width of the play/pause button
PlayPauseButtonHeight	Double	Height of the play/pause button
PlayPauseButtonPathWidth	Double	Width of the path for the play/pause button
PlayPauseButtonPathHeight	Double	Height of the path for the play/pause button
RadiusX	Double	X radius of the corner
RadiusY	Double	Y radius of the corner
Foreground	Color	Color of the foreground
ForegroundHover	Color	Color of the hover for the foreground
Background	Color	Color of the background
TextForegroundBrush	Color	Color of the text
TextFontSize	Double	Font size of the text
TextFontFamily	String	Font of the text
BackgroundOpacity	Double	Opacity of the background (0-1)
VolumeWidth	Double	Width of the volume element
PlayPathData	String	Abbreviated path markup for the visual
PausePathData	String	Abbreviated path markup for the visual
Margin	Thickness	Left, top, right, and bottom margins.

PeopleTag

Option	Type	Description
Enabled	Boolean	Indicates whether or not to display the element
PersonNameMargin	Thickness	Left, top, right, and bottom margins.
PersonNameForeground	Color	Color of the person name
PersonNameFontSize	Double	Font size of the person name
PersonNameFontFamily	String	Font of the person name
BackgroundBorderBrush	Color	Color of border around the tag
Background	Color	Background color of the tag
BackgroundBorderThickness	Thickness	Left, top, right, and bottom margins.
BackgroundCornerRadius	Double	Radius of the corner (CornerRadius or Double)
BackgroundOpacity	Double	Opacity of the background (0-1)

Sample XML configuration file

The following is a sample XML configuration file containing a full listing of all modules and options:

```
<configuration background="Silver" AutoStart="true" StartInAlbumView="false"
>
  <module name="Transition">
    <option name="TransitionDuration" value="500" />
    <option name="WaitTime" value="3000" />
  </module>
  <module name="DataProvider">
```

```

        <option name="Type" value="FlickrDataProvider" />
    </module>
    <module name="Preloader">
        <option name="PreloadAhead" value="5" />
    </module>
    <module name="LoadingProgressIndicator">
        <option name="Enabled" value="true" />
        <option name="Type" value="bar" />
        <option name="Height" value="3" />
        <option name="Width" value="75" />
        <option name="Foreground" value="White" />
        <option name="Background" value="Black" />
    </module>
    <module name="SlideNavigation">
